## The Horned Lark

613 Tamerisk, Junction City, KS 66441-3359

September, 2004

Vol. 31, No. 3

### **Who's Who in KOS - 2004**

**President**, Tom Shane, 1706 Belmont Place, Garden City, KS 67846, shane@pld.com

**Vice-president**, Marvin Kuehn, kuehnmar@emporia.edu

**Corresponding Secretary**, Bill Busby, 626 E 1900 Road, Baldwin, KS 66006

#### **Membership Development**

**Coordinator**, Mark Land, 8447 Lamar, Overland Park, KS 66207, kestrelland@aol.com

**Treasurer**, Dan Larson, 3636 SE 77th Street, Berryton, KS 66409

#### **Board Members:**

Matt Gearheart, mgearheart@gwhm.com

Lowell Johnson, ljohanson@plantpath.ksu.edu

Cheryl Miller, avian67226@hotmail.com

Kerrie Kirkpatrick, hawkowl@earthlink.net

**Business Manager**, Pete Janzen, 3137 Mascot Wichita, KS 67204, prarybrd@southwind.net

**Editor, *The Bulletin***, Calvin Cink, Baker University, PO Box 65, Baldwin City, KS 66006 Calvin.Cink@bakeryu.edu

**Editor, *The Horned Lark***, Chuck Otte, 613 Tamerisk, Junction City, KS 66441, 785-238-8800, otte@nqks.com

**Past-President**, Gene Young, youngg6264@yahoo.com

### **From The Keyboard -**

The September issue always announces the Fall KOS Meeting. All those details are on pages 12 to 16. Another great annual meeting is planned and I am looking forward to it, as always. Of particular interest is the banquet speaker, Jon Dunn. Many of us are familiar with Jon by way of the books he has written or edited. Now you have a chance to meet him in person and maybe even go birding with him. Even if you can't make any other part of the fall meeting, plan to attend the banquet!

Late summer is upon us and the early stages of the fall migration are already manifesting themselves to us. Breeding bird surveys, county listing, and various other activities that help us survive the summer doldrums between the end of spring migration and the start of fall migration, are now behind us. The anticipation of what may come yet this year quickly blocks out what has been, like a child waiting for Christmas.

Fall is a season of change, so I suppose it is somewhat fitting that this issue marks several changes, or transitions. John Rakestraw, in his Winged Tips section, talks about Lesser Prairie-Chickens. John has informed us that this will be his last installment. While John still has a strong interest in Kansas birds and birding, he has been gone from Kansas for eight years now and feels that it is time to clear the space for someone else. Thanks for all your great columns John.

Lloyd Moore has likewise decided to turnover the compilation reins for the seasonal roundup to someone else. There is a small handful of folks who understand how demanding it is to glean and maintain that information from season to season. Needless to say, we are still looking for someone to pick up this task.

When this issue is done, I will say good bye to the position of newsletter editor which I have held for a little over 12 years. It's been fun, but it's time for someone else to pick up the quill and take the *Horned Lark* on to the next level. I think we've found that person and if you don't know Cheryl, you can briefly meet her on page 11, right after my brief comments of my tenure. I'm not going to disappear. I'll still be active in KOS and will still serve as secretary of the Birds Record Committee. I have a lot of bird oriented projects that I want to work on, and various other activities certainly keep me busy. This change will allow me more time for those.

It's been a fun run as the editor, I thank you for the opportunity, and I hope to see many of you in Baldwin City in early October!

*Chuck*

# ANNOUNCEMENTS!

## Upcoming Meeting Locations

Please note the upcoming tentative spring and fall meeting locations. Mark your calendars, look for more information in coming issues and plan to attend!

**Spring 2005** - Pratt, Apr. 22 - 24

**Fall 2005** - Wichita

**Spring 2006** - Northern Crosstimbers Greenwood/Woodson Counties

**Fall 2006 and Beyond** - Volunteers and locations needed!

Start thinking of where you'd like to go, or if you would be willing to host a spring or fall meeting. Spring meetings simply need some good bird watching areas as well as sleeping and eating establishments. Fall meetings require some place to hold meetings of around 75 to 100 people plus a location for a banquet. There are many areas of the state that have yet to host a KOS field trip so be brave and step forward! Contact any of the officers or board members if you have an invitation or idea for an upcoming meeting.

## KOS Items Available

If you would like to purchase KOS T-shirts, sweatshirts, window stickers, etc. then you need to contact the *NEW* KOS Business Manager, Pete Janzen, 3137 Mascot Wichita, KS 67204, prarybrd@southwind.net, 316-832-0182.

**October 1** - Best Bird of the Year

## White-winged Doves

by Helen Hands

With so many species declining in numbers and with ranges that are contracting, it's unusual to hear about a species whose numbers are increasing and whose range is expanding. That's the case with the White-winged Dove and other species in the Columbiformes. Historically, a bird of Mexico and the southwestern portion of the U.S., according to Lloyd Moore's compilation (<http://www.ksbirds.org/KBRC/wwdo.htm>), there were 56 White-winged Dove records in 27 Kansas counties through August 2003 (plus at least three additional records in two new counties since then).

Actually, there are four breeding populations of White-winged Dove and not all are doing equally well. The Western population (in California, Arizona, Nevada, and New Mexico) is decreasing in both numbers and range, although in some areas numbers have remained stable. Little is known about the Upper Big Bend population whose range is much smaller than the other populations. The breeding ranges of the Mexican Highland and Eastern (southern half of Texas, northeastern Mexico, and Florida) populations have expanded northward. White-winged Dove that have been sighted recently in Kansas are most likely from the Eastern population.

As late as 1980, most White-winged Dove in the Texas portion of the Eastern population nested in the Lower Rio Grande River Valley. During the 1980s, some freezes and a 4-year drought devastated citrus orchards, where approximately 50% of the White-winged Dove nested. Consequently, numbers of White-winged Dove declined, but then White-winged Dove numbers in south-central Texas, near San Antonio, started increasing. Over 200,000 breeding White-winged Dove were estimated by the Texas Parks and Wildlife Department in San Antonio in 1990. By 2001, the breeding population in San Antonio had reached nearly 1.1 million with an additional 285,000 in Austin. During 1990-2001, the breeding population was higher in south-central Texas, mostly in urban areas, than in the Lower Rio Grande Valley.

Breeding Bird Survey data corroborate the Texas surveys. White-winged Dove increased in Florida (23.6%), Texas (10.8%), New Mexico (22.0%), California (9.1%), but declined in Arizona (-1.7%) during 1980-2003.

The wintering range of White-winged Dove has also increased as shown by Christmas Bird Count data, (<http://www.birdsource.org/features/doves/doves.html#map2>). Historically, White-winged Dove wintered in Mexico and

other countries in Central America. By the 1990s, White-winged Dove commonly wintered in central Texas and there was even a record as far north as Morton County, Kansas.

White-winged Dove are an interesting example of a bird species that can adapt to human-caused changes in habitat, as long as the changes are not too severe. In the Lower Rio Grande Valley, White-winged Dove populations increased when native brush habitats were first being converted to irrigated grain farming in the early 1900s. However, as more native brush was converted to agriculture and urbanization, White-winged Dove populations declined. When citrus production was introduced in the 1940s, White-winged Dove started to depend on citrus trees for nesting. However, then White-winged Dove populations became susceptible to occasional declines due to freezes that killed citrus trees.

In the past 15 years, White-winged Dove have been successful nesting in urban areas in Texas, but urbanization and suburbanization in Arizona have been detrimental. The key for White-winged Dove being able to adapt to habitat changes seems to be to retain a good mix of woody vegetation for nesting and grain production for foraging. Urban areas with woody vegetation (as well as bird feeders, lawn sprinklers, and bird baths) apparently provide nesting areas with less nest predation where White-winged Dove can produce more young than rural areas. In addition, the warmer temperatures and bird feeders in urban areas allow White-winged Dove to remain during winter, rather than face the hazards of migration.

### Reasons why you should attend the fall KOS meeting!

- \* A chance to meet other birders who share your passion.
- \* Listen to great presentations by students and members.
- \* Birding Field Trips
- \* The Birdwatcher's Hour
- \* Presentation of the Best Birds of the Year!
- \* Birding Field Trips
- \* Guest banquet speaker Jon Dunn
- \* The Resolutions
- \* Birding Field Trips
- \* Because it's just fun!!

## Lesser Prairie-Chickens

*by John Rakestraw*

One of my favorite Kansas birds, Lesser Prairie-Chickens are small grouse native to sand-sage prairies and Shinnery Oak rangelands of the southern Great Plains. They differ from the Greater Prairie-Chicken by their paler plumage, plum-colored vocal sacks, bubbling call, and more aggressive behavior on their leks.

Most people view Lesser Prairie-Chickens during the birds' spring courtship rituals. Male prairie-chickens gather to vie for dominance and to attract the attention of passing females. But some people feel that sitting in a blind has a "canned" quality to it, so they prefer to find the birds away from the leks. During autumn and winter, Lesser Prairie-Chickens can be seen flying into grain fields to feed at dawn and dusk.

Viewing Lesser Prairie-Chickens has become increasingly difficult over the past few decades, not because of the birds' elusive nature, but because of a steady decline in the specie's population.

In the late 19<sup>th</sup> and early 20<sup>th</sup> Centuries, these birds were abundant, with single flocks of several thousand being reported feeding in grain fields adjacent to the birds' prairie habitat. Market hunting and poaching during this period, followed by the "Dust Bowl" conditions of the 1930s dealt major blows to the Lesser Prairie-Chicken population. Since that time, more and more of the Lesser Prairie-Chicken's habitat has been converted to farmland and altered to promote cattle grazing. Biologists estimate that the specie's occupied range has decreased by at least 78 percent since 1963 and by 92 percent since the 1800s. The birds that remain are in small isolated populations in southwestern Kansas, southeastern Colorado, the Oklahoma Panhandle, western Texas, and eastern New Mexico. As the space between pockets of good habitat grow larger, it becomes less likely that the birds will be able to re-colonize parts of their former range and maintain sufficient genetic diversity. There have been at least 12 attempts to reintroduce Lesser Prairie-Chickens to areas of their former range, but all have failed.

In the past, intensive agriculture and cattle grazing have been the most common causes of habitat degradation and fragmentation. But oil and gas exploration and development continue to expand within the bird's range. Within the last decade, commercial wind-power facilities have appeared in increasing numbers. Prairie-Chickens show a strong avoidance of tall structures such as utility poles and wind turbines.

As areas of habitat continue to shrink, Lesser Prairie-Chickens face new threats from other bird species. In western Kansas, Lesser Prairie-Chickens have recently hybridized with Greater Prairie-Chickens. When a bird's population is dangerously low, hybridization further weakens the gene pool. Introduced Ring-necked Pheasants compete with Lesser Prairie-Chickens for food and nesting territories. Pheasants are known to disrupt the nesting of Greater Prairie-Chickens by laying their eggs in prairie-chickens' nests. This parasitism has recently been documented in Lesser Prairie-Chicken nests.

Most birders travel to the Cimarron National Grasslands to find Lesser Prairie-Chickens, but this species can be found at scattered sites throughout the southwestern third of Kansas. The birds may be expanding their range slightly northward. When I lived in Kansas, my favorite site was the Pratt Sandhills Wildlife Area, but lek counts in 2002 and 2003 did not find any birds there.

I encourage you to seek out Lesser Prairie-Chickens whenever you can, even if you don't "need" them for your state list. When traveling to find these birds, tell every gas station attendant, motel clerk, and waitress why you are there. Offer private landowners a few dollars for the privilege of viewing these birds on their land. The more the public becomes aware of the plight of these birds and of the financial benefits of protecting them, the better the chances that Lesser Prairie-Chickens will survive their current decline.

*John can be contacted at: [jmrake@quik.com](mailto:jmrake@quik.com)*

**Remember KOS...** If you would like to help the Kansas Ornithological Society's future growth consider leaving a memorial trust for the Society or including the KOS in your will. If you would like more information feel free to contact any of the Board Members.

# KANSAS SPRING SEASON ROUNDUP

March 1, 2004 through May 31, 2004

By Lloyd Moore

While many Kansas birders probably wouldn't call spring migration 2004 a bust, it was certainly less than spectacular.

We continue to see apparent increasing numbers of Trumpeter Swans, probable proof of the success of reintroduction efforts. Notable this season was a small FLOCK of Trumpeters in a field north of Ellinwood. One can only hope that this sight becomes a regular thing in years to come.

A definite highlight of the season was a well documented and photographed Ruff at Cheyenne Bottoms in late April. If accepted by the Kansas Bird Records Committee this will only be the 6<sup>th</sup> record for this species in Kansas.

Eurasian Collared-Doves are about to become not news worthy as all but a few counties in Kansas now have records and probably breeding populations.

What was news worthy with doves this spring was the appearance of White-winged Doves at numerous locations across Kansas. (If you have not yet read Helen Hands article on page 3, go there now!) Inca Doves continue to be seen regularly in southwest Kansas.

Several species appeared in Kansas at or near early record dates. While early arrival dates can be exciting, one can't help but wonder about the survival of these primarily insect eating species that early in the season.

As was indicated in an earlier issue, this will be my final seasonal roundup. Thanks to all who have contributed their bird sightings while I have served as compiler for the seasonal roundup. As soon as a new compiler is selected, please keep sending them your reports and remember to send documentation of rare or unusual species to the Kansas Bird Records Committee (KBRC). Use either the electronic form on the KOS web site <http://www.ksbirds.org> or regular mail to Chuck Otte, KBRC Secretary

## **Thank you KOS!**

For the last 12 years I have served as editor of the *Horned Lark*. I appreciate then KOS President David Seibel taking a chance on a fairly new, virtually unknown KOS member when he made that fateful phone call that June evening. In those days the two editors were appointed by the president, now they are elected by the membership. I encourage you all to join with me and cast a vote in October for the very capable Cheryl Miller! I've had a lot of help and support through the years from many folks. Past editors have been very supportive of changes I considered and were an eternal source of ideas. Many members stepped forward with regular articles, periodic contributions, and in recent years photos. A special thank you to the folks who served as seasonal roundup compilers. Scott, Chris, Pete and I understand very well why Lloyd has decided to pass that responsibility on.

I don't have a lot of room here, and that's fine with me. I've rattled on long enough over the past several dozen issues. And my ramblings may yet appear in these pages, in future issues, if the new editor is willing. I just want to say thank you to the members and the boards of the Kansas Ornithological Society for the past 12 years for letting me serve and grow in this position. It has been a pleasure for me, and I hope it has been for you as well!

*Chuck*

## **A Word from Your New *Horned Lark* Editor, Cheryl Miller**

Greetings fellow birders! I'm looking forward to serving as the *Horned Lark* editor. Please join me in thanking Chuck for his work in this capacity.

A little about me: I grew up on a farm in Harvey County and my mother still lives there. It's a small farm with a hay meadow, riparian habitat along Emma Creek and wheat, milo and bean fields. The house is surrounded by walnut, elm and cedar trees. Some of the more interesting birds we've had on the property include Swainson's Hawks, Long-eared Owls, Lazuli Buntings, Magnolia Warblers, Black-crowned Night-Herons and Winter Wrens. It was here that I became a birder and it is where I go often when I need time away.

When I'm not birding, I work at Wichita State University for the Fairmount College of Liberal Arts and Sciences. Part of my duties include general college relations. I write and edit our college's newsletter, maintain the webpage and work with faculty to coordinate the Watkins Visiting Professorship lecture series. This program allows us to bring top notch scientists to campus. Over the years we've hosted Jane Goodall, Steven Jay Gould, Niles Eldredge and Alan Feduccia. I like my job and am fortunate to work with people who have similar interests.

As *Horned Lark* editor, I'd like to hear your suggestions regarding content and format of the newsletter. Submissions, artwork and digital photos are welcome and may be sent to me at this e-mail address:

[avian67226@hotmail.com](mailto:avian67226@hotmail.com).

Grab your optics and get outdoors!

*Cheryl*

# 56<sup>th</sup> Meeting of the Kansas Ornithological Society

## Baker University, Baldwin City, Kansas

### Fall 2004

The Kansas Ornithological Society will be meeting at Baker University. The Biology Department will host the meeting on the weekend of 1-3 October. Meeting headquarters will be in Owens Musical Arts Building.

### Program

#### Friday, October 1

6:30-9:00 p.m. Informal reception in McKibben Recital Hall in Owens.

#### Saturday, October 2

6:30-8:00 a.m. Local field trip to the University of Kansas Breidenthal Biological Preserve and Douglas County Lake. Meet in parking lot north of the Harter Student Union.

8:00-9:00 Registration, lobby of Owens Musical Arts Building.

9:00-11:00 Morning paper sessions, Owens AV Room.

11:00 - 11:30 Business meeting

11:30-12:30 Lunch available at several restaurants several blocks south of campus in downtown Baldwin City or on Highway 56 (Ames Street) several blocks north. Board meeting at reserved table at Express Yourself Coffee Shop downtown.

1:00-2:00 Birdwatchers Hour. A-V Room of Owens. Bring photos and videos to share.

2:00-4:00 Afternoon paper session. Owens A-V Room.

4:00-5:00 Afternoon business meeting.

5:00-6:00 Free time

6:00- Banquet, Best Birds of the Year, Resolutions and Guest Speaker: Jon Dunn “**Sparrows of the Great Plains**” -Baker Student Union.

#### Sunday, October 3

6:30 Field Trips from Student Union parking lot.

12:00 Lunch- Broken Arrow Park in Lawrence (31<sup>st</sup> & Louisiana), adjacent to the Baker Wetlands. Compilation of weekend bird list.

**Banquet Guest Speaker:** Jon Dunn has been a birding tour leader with WINGS. He is the author of a number of books on birding including the *Peterson Field Guide: Warblers of North America*, and narrator of bird watching videos including *Hummingbirds of North America* and *Large Gulls of North America*. Jon is a Board Member for the American Birding Association and is a member of the AOU Committee on Classification and Nomenclature. (See Special Auction Notice for an opportunity to go birding with Jon Dunn on page 13)

**SILENT AUCTION:** **Members are encouraged to bring donated items for the Silent Auction.** Many items will be available for view and bidding at the Friday Evening Reception. All proceeds from this event go to the KOS Student Research Fund.

**SPECIAL ITEMS FOR SILENT AUCTION:** The proceeds from the following three items will go towards defraying cost of bringing Jon Dunn to Baldwin. The Local Committee thanks Mike Rader for obtaining the binoculars and his suggestions for this event.

I. *Bushnell Binoculars* [7 power Birders Model]

II. *Bushnell Binoculars* [8 x 42 Legends] This is a very fine pair of binoculars.

There will be a minimum bid of \$30 and \$250 respectively. Come prepared to acquire a great pair of binoculars.

III. *“Birding with the Experts”*. Both Jon Dunn and Mark Robbins will be leading a field trip for the top five bidders. Mark is Collections Manager for the KU Museum of Natural History and will be designing the itinerary for the field trip which will occur Sunday morning in conjunction with the other field trips. Mark is the leader for the World Record Kansas Big Day Event and knows all of the best birding spots in Eastern Kansas (don't plan on a chartered flight to Quivira, however). Minimum bid for this will be \$25. This promises to be a special occasion for all of the five winners.

Winners of ALL the Silent Auction items will be determined after the afternoon business meeting on Saturday.

Planned Field trips

I. Clinton Lake and environs.

II. Breidenthal and Rice Woodlands and Douglas County Lake.

III. Lone Star Lake, Rock Creek area, and Clinton Lake (part)

IV. Baker Wetlands (Cal Cink will be mist netting) This should be ideal for various sparrows.

V. Birding with the Experts – led by Mark Robbins and Jon Dunn. Available through winning bid in Silent Auction..

All field trips will leave from the parking lot north of the Harter Student Union in Baldwin.

#### **Directions to Baldwin City/Baker University:**

##### **From Kansas City**

Take I-35 south to the Gardner Exit (Exit 210; about 15 miles south of the I-35 and I-435 interchange). From Gardner, go west on highway 56 to Baldwin City (about 15 miles). Turn left on 6<sup>th</sup> Street at Quick Shop, 3 blocks south to Dearborn St., left ½ block to Union parking lot.

##### **From Wichita**

Take I-35 to the Ottawa exit (Exit 183). Proceed north on highway 59 to the junction of 59 and highway 56 (about 10 miles). Go east on 56 to Baldwin City (about 5 miles). Turn right on 6<sup>th</sup> St. at Quick Shop. South 3 blocks to Dearborn, left ½ block to Union parking lot.

##### **From Lawrence**

Take highway 59 south to the junction of highways 59 and 56 (about 10 miles) Go east on 56 to Baldwin City (about 5 miles). Turn right on 6<sup>th</sup> St. at Quick Shop, south 3 blocks to campus. Right on Dearborn ½ block to Union parking lot.

### **Dr Ivan L Boyd Recognition Award - Call for Nominations**

This award is to be given to a member(s) of the Kansas Ornithological Society (KOS), usually each year, for outstanding contributions and service to the society. The award is not a monetary award but shall be presented to an individual(s) as a plaque with appropriate information provided. Individuals must be nominated by another KOS member. Nominations should be submitted to the Board with instructions on deadlines and procedures provided to the membership in a timely manner. Nominations should provide a list of the nominee's contributions to KOS. Contributions could include such things as number and years of offices held, committee involvement, papers presented at KOS, papers published in the *Bulletin* or *Horned Lark*, number of CBC's compiled, and years of membership; this is not an exclusive list and other contributions to the society may be provided. Current KOS Board members are not eligible to receive an award. The Board may select more than one recipient each year or may choose not to name a recipient in a given year. Please send nominations to Tom Shane by September 15. Contact information for Tom is on page 1 of the *Horned Lark*.

## Accommodations:

Please make your own motel reservations.

There is one motel in Baldwin with a block of rooms **held until September 1<sup>st</sup>**.

Advise them that you are attending the "KOS Meeting". This will be homecoming weekend at Baker so **early reservations are encouraged**.

### **The Lodge- 502 Ames (Hwy 56), Baldwin City, KS 66006 785-594-3900**

peach@thesandbar.com , info@baldwinlodge.com

There are 2 bed and breakfasts in Baldwin City:

The Three Sisters Inn, 1035 Ames, 785-594-3244

Grove House, 807 Grove St., 785-594-2947

**KANSAS ORNITHOLOGICAL SOCIETY  
FALL 2004 MEETING  
CALL FOR PAPERS  
SATURDAY, OCTOBER 2, 2004  
BAKER UNIVERSITY  
BALDWIN CITY, KANSAS**

The fall meeting of the KOS for 2004 will be held in Baldwin City. Paper sessions will take place in the morning and afternoon of Saturday, 2 October, in the AV Room of Owens Musical Arts Building. Audio/visual equipment includes 35 mm slides, VHS video, and computer projection. Papers on any topic of interest to Kansas ornithologists and birdwatchers are requested. Our paper sessions traditionally include both technical and general interest presentations. Student papers will be judged and the best paper announced at the banquet Saturday night. All student presenters will receive a year's free membership in KOS.

Please submit your abstract by mail, e-mail or fax to:
