The taxonomic sequence and nomenclature used in this list follow the *Check-list of North American Birds*, 7th edition, American Ornithologists Union, 1998, updated through the 64th Supplement, 2023, *Ornithology*, 2023, 140, 1-11, 6 July 2023, <https://doi.org/10.1093/ornithology/ukad023>

A record for Taiga/Tundra Bean Goose (*Anser fabalis/Anser serrirostris*) was accepted in 2020. However, since it wasn't accepted at the species level it will not be added to the KOS Check-list at this time.

Of the 486 species documented to have occurred in Kansas as of March 2024, four species are not included in this list because they no longer occur in the state. The Passenger Pigeon and Carolina Parakeet are extinct, the Eskimo Curlew is probably extinct and the Gunnison Sage-Grouse has been extirpated from the state. Ten species on the list, although convincingly documented, records have yet to be substantiated with physical evidence and are therefore designated as hypothetical and listed in square brackets ([ ]). Birds so noted, or those noted with this symbol (\*) indicating less than ten confirmed records, or species not on this checklist, should be reported to the Kansas Bird Records Committee (KBRC). Physical evidence, such as recognizable photographs, video or audio recordings, is highly desirable. The procedure for reporting birds to the KBRC can be found at [https://www.ksbirds.org/kos/kos\\_kbrc.htm](https://www.ksbirds.org/kos/kos_kbrc.htm).

This checklist is maintained by the Kansas Ornithological Society (KOS). KOS is Kansas's only statewide organization devoted exclusively to the study, conservation, and enjoyment of birds. KOS is a diverse group ranging from casual backyard birdwatchers to professional ornithologists. To learn more about KOS, how you can join KOS, or more about birds in Kansas, please visit our website <https://ksbirds.org/>.
