482 species

A record for Taiga/Tundra Bean Goose (*Anser fabalis*/*Anser serrirostris*) was accepted in 2020. However, since it wasn't accepted at the species level it will not be added to the KOS Check-list at this time.

Of the 485 species documented to have occurred in Kansas, three species are not included on this list because they no longer occur. The Passenger Pigeon and Carolina Parakeet are extinct, and the Gunnison Sage-Grouse has been extirpated from the state.

The taxonomic sequence and nomenclature used in this list follow the *Check-list of North American Birds*, 7th edition, American Ornithologists Union, 1998, updated through the 64th Supplement, 2023, Ornithology, Volume 140, Issue 3, 11 July 2023, ukad023, <https://doi.org/10.1093/ornithology/ukad023>
