† Fewer than ten Kansas records

[] Hypothetical species

Of the 487 species documented to have occurred in Kansas, three species are not included in this list because they no longer occur. The Passenger Pigeon and Carolina Parakeet are extinct, and the Gunnison Sage-Grouse has been extirpated from the state.

A record for Taiga/Tundra Bean Goose (*Anser fabalis*/*Anser serrirostris*) was accepted in 2020. However, since it wasn't accepted at the species level it will not be added to the KOS Check-list at this time.

This list represents all actions of the Kansas Bird Records Committee through November 15, 2024.

The taxonomic sequence and nomenclature used in this list follow the Check-list of North American Birds, 7th edition, American Ornithologists Union, 1998, updated through the 65th Supplement, Ornithology, Volume 141, Issue 3, 1 July 2024, ukae019, <https://doi.org/10.1093/ornithology/ukae019>
